

ABDUSSALAM ASWIN HADIST

Full Stack Web Developer · AI Engineer

✉ cadelmilitary@gmail.com | ☎ 082282169581 | 📍 Jambi, Indonesia | GitHub: Abdussalam50 | LinkedIn: abdussalam-hadist

ABOUT ME

A developer with a Physics Education background who independently mastered full-stack web development and AI engineering. Experienced in building LLM-based systems (Anthropic Claude, Gemini), RAG pipelines, and AI tools for real-world needs including intelligent linting, AI-integrated LMS, and stealth scraping with obfuscation techniques. With 1 year of professional experience delivering 60+ websites, I bring a responsive, collaborative, and solution-oriented working style.

TECHNICAL SKILLS

Frontend	HTML5 · CSS · JavaScript · React JS · Tailwind CSS · Bootstrap
Backend	Python · PHP · Laravel · FastAPI · Flask
Database	MySQL · MongoDB · PostgreSQL
AI / ML	Anthropic API · Gemini API · LangChain · RAG Systems
Languages	Indonesian (Native) · English (Active)

RELEVANT PROJECTS

Stealth Scraper Engine

Playwright · FastAPI · Flask · Polymorphic Text Obfuscation · PostgreSQL

Built a stealth scraper with an active defense system against adversarial AI bots, using text obfuscation and polymorphism techniques to poison data harvested by bots. The backend is powered by FastAPI and Flask, with Playwright as the browser automation engine.

🔗 https://github.com/Abdussalam50/stealth_engines

Vice Agent — AI-Powered Code Linter

ESLint · Pylint · React JS · Gemini LLM · FastAPI · Tailwind CSS · PostgreSQL

An automated linting agent for Python and JavaScript projects using ESLint and Pylint. Linting results are exported to a React JS dashboard integrated with the Gemini LLM, providing natural language explanations of error diagnoses to help developers understand and fix code issues faster.

LMS with AI Assistant & RAG Chatbot

Anthropic Claude · LangChain · RAG · PDF Rendering · Laravel · Livewire · MySQL · Tailwind CSS

A Learning Management System (LMS) integrated with a Claude (Anthropic) AI assistant to support students, and a RAG chatbot capable of rendering and processing user-uploaded PDF documents to provide contextual responses based on document content.

Steze Hotel Management System

PHP Native · JavaScript · MySQL · Bootstrap · CSS

A hotel & guest house operations management app with 4 user levels (super admin, admin, operational admin, customer service). Features include real-time room monitoring & management via Fetch API, an automatic room availability validation system to prevent booking conflicts, transaction & operational reports with visitor trend charts, and a responsive, user-friendly interface.

KostKito.com

Laravel · JavaScript · MySQL · Tailwind CSS

A boarding house directory platform in the Jambi area that connects room seekers (students) directly with property owners. Features 3 user levels (admin, partner/owner, public) with search, property listing, and direct contact functionality.

WORK EXPERIENCE

Web Developer

Dec 2024 – Dec 2025

PT Ridikc Industries Indonesia — Jambi, Indonesia

- Worked as a Full Stack Developer — delivered 60+ websites from initial development to maintenance and debugging.
- Demanded to work fast, proactively learning various tech stacks and efficient architectures.
- Hands-on experience with diverse client needs, ranging from landing pages to complex web applications.

EDUCATION

Bachelor of Physics Education

Aug 2020 – Jan 2025

Universitas Jambi — Jambi, Indonesia

- Completed a 4.5-year Physics program while independently developing full-stack and AI engineering skills.
- Actively involved in student organizations and academic seminar committees.

Science — Senior High School (SMA)

Jul 2017 – Jun 2020

SMAN 10 Kota Jambi — Jambi, Indonesia

- Achieved outstanding academic performance in Physics — ranked top 3 in class for 2 consecutive years.
